Attempt : 1

Total Mark : 10

Marks Obtained : 10

Section 1 : Coding

1. Problem Statement

Monica is interested in finding a treasure but the key to opening is to get the sum of the main diagonal elements and secondary diagonal elements.

Write a program to help Monica find the diagonal sum of a square 2D array.

Note: The main diagonal of the array consists of the elements traversing from the top-left corner to the bottom-right corner. The secondary diagonal includes elements from the top-right corner to the bottom-left corner.

Input Format

The first line of input consists of an integer N, representing the number of rows and columns.

The following N lines consist of N space-separated integers, representing the 2D array elements.

Output Format

The first line of output prints "Sum of the main diagonal: " followed by an integer, representing the sum of the main diagonal.

The second line prints "Sum of the secondary diagonal: " followed by an integer, representing the sum of the secondary diagonal.

Refer to the sample output for formatting specifications.

Sample Test Case

Input: 3
1 2 3
4 5 6
7 8 9

Output: Sum of the main diagonal: 15
Sum of the secondary diagonal: 15

Answer

```
import java.util.*;  
public class Main{  
    public static void main(String[]args){  
        Scanner s = new Scanner(System.in);  
        int n = s.nextInt();  
        int[][] a= new int[n][n];  
        int sum_m=0;  
        int sum_s=0;  
        for(int i=0;i<n;i++){  
            for(int j=0;j<n;j++){  
                a[i][j]=s.nextInt();  
                if(i==j){  
                    sum_m+=a[i][j];  
                }  
            }  
            sum_s+=a[i][n-i-1];  
        }  
    }  
}
```

```
        System.out.println("Sum of the main diagonal: "+sum_m);
        System.out.println("Sum of the secondary diagonal: "+sum_s);
    }
}
```

Status : Correct

Marks : 10/10
